Table of Contents

Introduction

This is the Quality Assessment and Improvement Comprehensive Report for Autism Diagnostic Evaluations Resources Services, Inc. also known as ADERS. This is year one in the Quality Assessment and Improvement Process and ADERS received an onsite review. This process is a way to continuously improve an effective system of services and supports that are flexible and person centered for the improvement of all individuals enrolled in the ODP system.

QA&I Summary

ADERS submitted their self-assessment on time through the ODP questionpro system. ADERS does not support any individuals at this time through the ODP system. They are qualified to provide behavioral supports for those enrolled in the ODP system. ADERS is planning to become a provider of more services than behavioral supports in the future to those individuals enrolled in the ODP system. Due to ADERS not providing services to anyone, there were no records reviewed, there were also no staff records reviewed because they have no staff providing services. ADERS administrative staff is hopeful and eager to provide services to those served through the ODP waivers.

Data Analysis and Performance Evaluation

ADERS does not provide services to any individuals enrolled in the ODP system. They have an annual training that they complete for all of their staff who provide services for other entities. ADERS incorporates the ODP required trainings into their annual training for their staff providing services through other entities. It was found that they did not incorporate 2 elements of the ODP required training; department issued policies and procedures as well as billing. ADERS plan to incorporate these two identified areas into their annual training going forward.

ADERS has a Quality Management plan that they reference and have realistic goals for themselves as they begin to provide services to those enrolled in the ODP system.

Appendices

- ADERS MCI Review
- Corrective Action Plan
